Milliken Contract

Certifications & Transparency

Above Left: Alabama School of Math and Science, Birmingham, AL
Above Right: Santa Monica Public Library, Santa Monica, CA (LEED NC Gold Certified)

Milliken Ecountability means we are responsible for our impact on the Earth. Adherence to third-party certification assures our customers of durable carpet designed with minimal environmental impact produced in a sustainable manner. Our certifications cover:

- Products—carbon neutral, NSF 140, SMaRT®, and Green Label Plus
- Facilities—LEED®
- Manufacturing—carbon negative Cleaner and Greener®, OSHA VPP Star and ISO 14001.

Third party verification is critical for transparency with sustainable products and practices.

PRODUCTS

All carpet products are certified carbon neutral by the Leonardo Academy as well as meeting Green Label Plus for Indoor Air Quality (CA 01350 equivalent) criteria. All commercial products are certified to NSF 140, the Sustainable Carpet Assessment Standard. Milliken is the only carpet to earn SMaRT® Sustainable Product Platinum certification. The Carpet and Rug Institute rates more than 95% of our carpet products for “Severe Wear” (highest rating for appearance retention).

LEED®

We design products for high performance green buildings.

No other carpet contributes more toward LEED. Milliken’s 100% post-consumer recycled closed loop Earth Square® system is the only carpet product classified as refurbished or reused that contributes to LEED. TractionBack® and First Appearances® Entry Systems and MilliCare® also may contribute to LEED.

Internally, we have a plan to bring all Milliken facilities to LEED standards, starting with registration of our corporate headquarters and design center. Milliken’s Chicago and New York Showrooms have already achieved Gold Certification under LEED for Commercial Interiors Rating System.

MANUFACTURING

Milliken meets carbon negative certification without purchased credits based on energy reduction, renewable energy, and carbon sequestration delivered by its forests and verified by the respected Leonardo Academy. In addition, we maintain our industry’s only Cleaner and Greener® certification for reducing and offsetting emissions to improve climate and health. Milliken’s floor covering division has a Gold ranking with the Partnership for Sustainable Georgia.

Milliken was the first U.S. carpet company to obtain ISO 9000 certification for quality management. All textile plants are certified to ISO 14001—the highest global standard for environmental responsibility. Safety is a priority. All U.S. plants are certified as OSHA VPP STAR and all global locations meet or exceed safety regulatory standards.
